

PROWL[®]

3.3 EC herbicide

Supplemental Labeling

FOR DISTRIBUTION AND USE ONLY WITHIN IDAHO

EPA Reg. No. 241-337

EPA SLN No. ID-930012

FOR WEED CONTROL IN ALFALFA GROWN FOR SEED PRODUCTION

OBSERVE ALL PRECAUTIONARY STATEMENTS, MIXING AND APPLICATION INSTRUCTIONS, AND ROTATIONAL CROP RESTRICTIONS IN THE PROWL 3.3 EC LEAFLET LABEL BEFORE USING.

DIRECTIONS FOR USE

This label expires on December 31, 2005.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. PROWL 3.3 EC herbicide controls most annual grasses and certain broadleaf weeds as they germinate, but it will not control established weeds. Unusually cold, excessively wet, or hot and dry conditions that delay germination or extend it over a long period of time may reduce weed control.

Some stunting and chlorosis of the alfalfa may occur with postemergence applications.

Apply PROWL 3.3 EC herbicide at optimum application timing for dodder or other weed control on or before May 15 to established alfalfa at a broadcast rate of 1.2 to 4.8 quarts per acre prior to weed emergence. Apply PROWL 3.3 EC before alfalfa exceeds 10 inches in height after the first mowing/beating only. Once the alfalfa reaches 10 inches in height or if the alfalfa has been mowed /beaten two or more times, PROWL must be applied using drop nozzles directing the spray so that there is little or no contact with the foliage.

Uniformly apply in 10 or more gallons of water per acre with ground equipment, or in 5 or more gallons of water per acre with aircraft. **Applications when alfalfa exceeds 6 inches in height may result in poor weed control in the crop row due to possible reduced spray coverage to the soil.**

DO NOT exceed 4.8 quarts of product per acre in any one crop season. **DO NOT** apply this product through any type of irrigation system.

PROWL 3.3 EC is most effective when mechanically incorporated, or when incorporated in the weed germination zone by rainfall or irrigation within 7 days of application.

DO NOT apply after May 15.

DO NOT apply to seedling alfalfa.

DO NOT feed or graze alfalfa following PROWL 3.3 EC application. **DO NOT** cut treated alfalfa for hay or forage. **DO NOT** use harvested seed for sprouting. Processed seed must be labeled "Not for human or animal consumption" at the processing plant. All alfalfa seed screenings must be disposed of in such a way that they cannot be distributed or used for food or feed.

DO NOT USE on peat or muck soils.

NOTE: If loss of alfalfa stand occurs due to adverse weather conditions, any crop registered for PROWL 3.3 EC preplant incorporated use can be replanted the same year into PROWL 3.3 EC treated soil without adverse effects. If replanting is necessary, soil should not be reworked deeper than the PROWL 3.3 EC treated zone.

PROWL 3.3 EC applied at a rate of 1.2 to 2.4 quarts per acre prior to weed emergence will control the following weeds:

GRASSES

Barnyardgrass (*Echinochloa crus-galli*)
Crabgrass (*Digitaria* spp.)
Crowfootgrass (*Dactyloctenium aegyptium*)
Fall panicum (*Panicum dichotomiflorum*)
Field sandbur (*Cenchrus incertus*)
Foxtail (giant) (*Setaria faberi*)
Foxtail (green) (*Setaria viridis*)
Foxtail (yellow) (*Setaria lutescens*)
Goosegrass (*Eleusine indica*)
Johnsongrass (from seed) (*Sorghum halepense*)
Signalgrass (*Brachiaria platyphylla*)
Texas panicum (*Panicum texanum*)
Witchgrass (*Panicum capillare*)

BROADLEAF WEEDS

Carpetweed (*Mollugo verticillata*)
Florida Pusley (*Richardia scabra*)
Kochia (*Kochia scoparia*)
Lambsquarters (*Chenopodium album*)
Pigweed (*Amaranthus* spp.)
Purslane (*Portulaca oleracea*)
Spurge, annual (*Euphorbia* spp.)

PROWL 3.3 EC applied at a rate of 2.4 to 4.8 quarts per acre prior to weed emergence will control the following weeds in addition to those listed above:

GRASSES

Bluegrass (annual) (*Poa annua*)
Browntop panicum (*Panicum fasciculatum*)
Itchgrass (*Rottboellia exaltata*)
Junglerice (*Echinochloa colonum*)
Lovegrass (*Eragrostis* spp.)
Mexican sprangletop (*Leptochloa uninervia*)
Red Sprangletop (*Leptochloa filiformis*)
Shattercane (*Sorghum bicolor*)
Wild proso millet (*Panicum miliaceum*)
Woolly cupgrass (*Eriochloa villosa*)

BROADLEAF WEEDS

Chickweed (common) (*Stellaria media*)
Dodder (*Cuscuta* spp.)
Fiddleneck (*Amsinckia intermedia*)
Henbit (*Lamium amplexicaule*)
Knotweed (prostrate) (*Polygonum aviculare*)
London rocket (*Sisymbrium irio*)
Pennsylvania smartweed
(*Polygonum pensylvanicum*)
Puncturevine (*Tribulus terrestris*)
Shepherdspurse (*Capsella bursa-pastoris*)
Velvetleaf (Buttonweed) (*Abutilon theophrasti*)

Rotational crop restrictions:

The following crops may be planted after the indicated time interval depending on the crop and rate used.

Crop	-----Rate per Acre-----		
	less than 1.8 quarts	1.9 to 3.6 quarts	3.7 to 4.8 quarts
Crops labeled for preplant incorporated application	same season	4 months	4 months
Wheat	4 months	12 months	18 months
Red beets, sugar beets and spinach	12 months	18 months	24 months
Other crops*	following year	18 months	24 months

*Barley may be planted 12 months after an application of up to 2.4 quarts per acre.

To avoid crop injury, land should be plowed using a moldboard plow when greater than 1.8 quarts per acre are used, or when rotating to sugar beets, red beets, or spinach at any use rate.

This label must be in the possession of the user at the time of herbicide application.

DISCLAIMER

THE USER ASSUMES ALL RISKS AND CONSEQUENCES ASSOCIATED WITH APPLICATIONS OF PROWL 3.3 EC TO ALFALFA GROWN FOR SEED PRODUCTION.
